"For the Spiritual Being, Intuition is far more than a hunch. It is viewed as guidance or as the higher-self talking, and this inner insight is never taken lightly or ignored."

— Wayne Dyer

"The intellect has little to do on the road to discovery. There comes a leap in consciousness, call it Intuition or what you will, and the solution comes to you, and you don't know how or why". — Albert Einstein

Intuitive Coaching — New Energy for your Business

In today's competitive and fast-paced environment, decisions need to be made quickly and accurately. While many top level executives won't publicize it, intuition is a key part of their decision-making success. Most call it a "gut feeling". Whatever means is used to describe it, intuition is direct and immediate knowledge. Intuition is the compass needed in today's business world. Intuition is NO longer an optional talent, it is a necessity for today's CEO or Top level Executive.

Intuition is that COMPETITIVE EDGE WE ALL DESIRE.

Karen uses her intuition to provide insights and guidance that get to the core issues of a business or an Executive situation. The Core issue is seldom the issue we talk about or we refer to. The core issue takes us out of our comfort zone and focuses the issue more on "US" the Person not the Executive. She has worked with many CEO's over the years, and has discovered that we as CEO's are not always in touch with what the "REAL ISSUE" really is, until we have some assistance directing us to those places we so seldom want to look at.

Karen can help you and your company achieve success by Guiding you to:

See and identify the Core Issues.

Recognize Dynamics that got you here and recognizing NEW Dynamics that are needed to move into the next Phase of Growth and or the next phase of your life.

Make decisions with confidence.

Come Alive again in your VISION with passion and drive.

Let Go of FEAR.

Achieve your goals more quickly.

Gain insight into what motivates people.

Act with better timing.

Better understand market trends.

Gain competitive advantage over others in your industry through Intuitive insight.

“Karen has shared her intuitive coaching with my team now for about two years. The incredible insights and information she has brought to my awareness is incredible. I am aware of Eastern cultures using this type of Intuitive Guidance for many parts of decision making in their lives, but I had not heard about this type of coaching in the Western Cultures until I met Karen. The depth of information and the accuracy of her Intuitiveness is at times very confronting, because it takes you out of your comfort zone and identifies the core issues which often pointed accountability toward myself within my own organization. She used such finesse to communicate without damaging my VERY large ego, and also to reach me in a time my Organization needed me to wake up and find new direction. I was able to slowly let go of EGO (this will be a continual process), and fear, and re-focus on Vision and Passion, which is what propelled my success in the beginning, which I had lost focus of. Karen is an Intuitive Coach I plan on keeping employed with my staff and me in the years to come”.
